

# Fed up with unaffordable innovations?

Come attend our Symposium:

## Medical nutrition: a cost-effective pillar in therapeutic interventions

9<sup>th</sup> HTAi Annual Meeting 2012  
Bilbao, June 23<sup>rd</sup>-27<sup>th</sup>, 2012

Sunday 24<sup>th</sup> of June 2012 - 13:30-17:00

Scalpel. Scissors. Fork?

There is a new way to help treat certain diseases: Personalised medical nutrition. Back in 1866, Henri Nestlé was already reducing infant mortality with his innovative baby formula. Today, we expand his vision by developing personalised nutritional solutions that aim to help change and slow the progression of many chronic diseases, alleviate the side effects of some medical treatments and prevent specific diseases. Nestlé Health Science is well-positioned to lead change in the new field of personalised nutrition.

# Medical nutrition: a cost-effective pillar in therapeutic interventions

*Chairman: Hélène Chevrou-Séverac, PhD, Global Head Health Economics, Nestlé Health Science*
